

First the government broke up my beloved Bell System and now my XM radio is threatened. I finally got rid of people screaming at me to get my tired self to some car lot to buy their car or to their furniture store to buy a furniture I do not want. I want XM to stay the same including weather and traffic reports. I urge you to reject NAB's petition 04-160. They do not care about the public. They are self-serving.
